                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    USA
                                                                                                                                                                                                                                                                 10.5 kb range using preparative agarose gel electrophoresis. Vector DNA was prepared from a derivative of pWD42 (gi|473214|gb|AF129072.1), a copy-number inducible derivative of plasmid R1. The vector was ligated with adaptors complementary to the insert adaptors and purified. The sheared, adaptored mouse DNA was annealed to adaptored vector DNA, and transformed into chemically-competent E. coli XL10-Gold (Stratagene) cells and selected for ampicillin resistance."
                                                                                                                                                                                                                                                                                                                                                                                                                                               (http://www.jax.org/resources/documents/dnares/). The DNA was hydrodynamically sheared by repeated passage through & 0.005 inch orifice at constant velocity. The sheared DNA was blunt end-repaired with T4 DNA polymerase and T4 polynucleotide kinase. Adaptor oligonucleotides were ligated to the blunt ends in high molar excess. The ligated DNA was purified and size-selected for a 9.5 to

           Email: msoares@blue.weeg.uiowa.edu
The sequence contained an oligo-dT track that was present in the oligonucleotide that was used to prime the synthesis of first strand cDNA and therefore this may represent a bonafide poly A tail. The sequence tag present in the cDNA between the NotI site and the oligo-dT track served to verify it as a clone from the non-normalized rat tongue library cDNA Library Preparation: M.B. Soares Lab Clone distribution: clones will be available through

polylinker; Site 1: Not I; Site 2: Eco RI; The UI-R-DL0
library is a non-normalized Rat Tongue library constructed
in pT377 PAC vector according to the procedure described
by Bondo, Lennon & Soares (Genome Research Genome 6:
791-806, 1996). The oligonucleotide used to prime first
strand synthesis contained the sequence tag GCGAA between
the Not I cloning site and dT18 stretch.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Location/Qualifiers

The sequence contained an oligo-dT track that was present in the oligonucleotide that was used to prime the synthesis of first strand cDNA and therefore this may represent a bonafide poly A tail. The sequence tag present in the cDNA between the NotI site and the oligo-dT track served to identify it as a clone from the normalized cerebellum library cDNA Library Preparation: M.B. Soares Lab Clone distribution: clones will be available through Research

The sequence contained an oligo-dT track that was present in the
oligonucleotide that was used to prime the synthesis of first
strand cDNA and therefore this may represent a bonafide poly A
tail. The sequence tag present in the cDNA between the NotI site
and the oligo-dT track served to identify it as a clone from the
normalized cerebellum library cDNA Library Preparation: M.B. Soares
Lab Clone distribution: clones will be available through Research
Genetics (www.resgen.com) The following repetitive elements were

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              The invention relates to an isolated nucleic acid mol a T cell derived inducible factor (TIF) which are up cytokine interleukin-9 (II-9) and induce STAT transcriactivation. The TIF proteins (or their muteins) may lant/agonists for their potency against lymphomas, immulsorders, allergies, asthma, acquired immunodeficies autoimmune diabetes and thyroiditis. TIF mulnodeficies or inhibit differentiation of tissue types in which therefore be used to develop treatments for melanomas. The present sequence a partial genomic sequence for melanomas.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        New isolated nucleic acid molecules encoding T cell useful as markers for expression or effect of interlesubject and diagnosing susceptibility to asthma or a

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Ş
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   B
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Ş
                                                                      The present invention relates to an isolated nucleic acid molecule, whice encodes a T cell derived inducible factor comprising an amino acid sequence encoded by defined nucleotide sequences. The nucleic acid molecules are shown to be up regulated by the cytokine interleukin-9 (IL-9) and are described as T Cell Derived Inducible Factors (TIFs). The invention is used in protein therapy. The nucleic acid molecules encode proteins which induce STAT activation in cells. They can be used, for example, in the stimulation of regeneration of targetted tissues. Further, their inhibitors or antagonists can be used to retard, prevent or inhibit differentiation of other tissues. The present sequence is

TIP polynucleotides are upregulated by the cytokine, II-9. II-TIF or II-21 molecules are implicated in activation of STAT transcription factors, acute phase proteins and inflammation. The present sequence is mouse TIF alpha genomic DNA.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    HPI;

BW5147, can be grown in vitro, without the need to add any cytokines to its culture medium. Many IL-9 activities are mediated by activation of STAT transcription factors. The novel TIFs were expressed in the presence of IL-9, but not in its absence. TIFs induce STAT activation in cells. They can be used, e.g. in the stimulation of regeneration of targeted tissues. Their inhibitors or antagonists can be used to retard, prevent or inhibit differentiation of other tissues. The TIFs and their coding sequences are useful in the treatment of asthma, allergies and their coding sequences are also useful for identifying compounds that inhibit or activate T cell induced factor activity in a cell (claimed).

```
CC by subtraction cloning from a murine lymphoma cell line BMS147 in the CC presence or absence of interleukin 9 (II-9). As compared to the coding CC region for TIF-alpha (see AAA28816), that of TIF-beta has six silent CC changes. There are two changes which result in an inconsequential amino CC acid change (at both of positions 36 and 103, Val in TIF-alpha becomes CC Ile in TIF-beta). There is also a more significant change at position CC Il2, where Gln becomes Arg. Many IL-9 activities are mediated by CC activation of STAT transcription factors. The novel TIFs were expressed CC in the presence of II-9, but not in its absence. TIFs induce STAT CC activation in cells. They can be used, e.g. in the stimulation of cregeneration of targeted tissues. Their inhibitors or antagonists can be CC used to retard, prevent or inhibit differentiation of other tissues. The CC regeneration of targeted tissues are useful in the treatment of asthma, CC allergies and lymphoma (claimed). They are also useful for identifying CC compounds that inhibit or activate T cell induced factor activity in a CC cell (claimed).

New isolated nucleic acid molecules encoding T cell inducible facuseful as markers for expression or effect of interleukin (IL)-9 subject and diagnosing susceptibility to asthma or allergy factors,

WPI;

2001-638496/73

Claim 1; Page 21-23; 26pp; English

The invention relates to an isolated nucleic acid molecule, which encode a T cell derived inducible factor (TIF) which are upregulated by the cytokine interleukin-9 (II-9) and induce STAT transcription factor activation. The TIF proteins (or their muteins) may be used to test II-9 ant/agonists for their potency against lymphomas, immune system disorders, allergies, asthma, acquired immunodeficiency syndrome (AIDS), autoimmune diabetes and thyroidditis. TIF molecules promote regeneration or inhibit differentiation of tissue types in which they are active and therefore be used to develop treatments for melanomas and hepatomas. The present sequence a partial genomic sequence for mouse TIFbeta.

Sequence 5935 BP; 1732 A; 1174 C; 1346 G; 1683 T; 0 other;

TIF polynucleotides are upregulated by the cytokine, IL-9. IL-TIF or IL-21 molecules are implicated in activation of STAT transcription factors, acute phase proteins and inflammation. The present sequence is mouse TIF beta genomic DNA.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Stimulating expression of STAT transcription factor and inducing production of acute phase protein in a cell, involves contacting capable of expressing STAT with T cell derived inducible factors
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          WPI;
